

Effective: October 1, 2024

Guideline Type	<input checked="" type="checkbox"/> Prior Authorization <input type="checkbox"/> Non-Formulary <input type="checkbox"/> Step-Therapy <input type="checkbox"/> Administrative
-----------------------	---

Applies to:

- CarePartners of Connecticut Medicare Advantage HMO plans, Fax 617-673-0956
- CarePartners of Connecticut Medicare Advantage PPO plans, Fax 617-673-0956

Note: While you may not be the provider responsible for obtaining prior authorization, as a condition of payment you will need to ensure that prior authorization has been obtained.

Overview

Four principles guide the approach to pharmacologic treatment of hereditary angioedema (HAE) and include: availability of effective on-demand acute therapy for all patients, early treatment to prevent attack progression, treatment of attacks irrespective of the site of swelling, and incorporation of long-term prophylaxis based on highly individualized decision-making reflecting a physician-patient partnership.

Approval of Cinryze was based on crossover trial where prophylaxis with Cinryze decreased the frequency of attacks in half compared to placebo at 12 weeks (6.26 vs 12.73). Patients treated with Cinryze generally also had milder and short attacks.

Food and Drug Administration – Approved Indications

Cinryze (C1 esterase inhibitor [Human]) is a C1 esterase inhibitor indicated for routine prophylaxis against angioedema attacks in adults, adolescents and pediatric patients (6 years of age and older) with Hereditary Angioedema (HAE).

Clinical Guideline Coverage Criteria

The plan may authorize Cinryze for Members when the following criteria is met:

1. The Member is at least 6 years of age
- AND**
2. Documented diagnosis of hereditary angioedema
- AND**
3. Documentation the requested medication is being prescribed for routine prophylaxis of hereditary angioedema attacks
- AND**
4. Prescribed by or in consultation with an allergist, immunologist, or hematologist

Limitations

- None

Codes

The following code(s) require prior authorization:

Table 1: HCPCS Codes

HCPCS Codes	Description
J0598	Injection, C1 esterase inhibitor (human), (Cinryze), 10 units

Approval And Revision History

September 13, 2022: Reviewed by Pharmacy and Therapeutics Committee (P&T)

September 21, 2022: Reviewed by the Medical Policy Approval Committee (MPAC)

Subsequent endorsement date(s) and changes made:

- December 12, 2023: Minor wording changes. Removed the Limitations Cinryze® (C1 esterase inhibitor [human]) will not be approved for the treatment of acute HAE attacks and Any indications other than FDA-approved indications are considered experimental or investigational and will not be approved by the health plan. Removed pulmonologist as a provider specialty (eff 2/1/24).
- November 2023: Administrative Updates: Rebranded from Tufts Health Unify to Tufts Health One Care for 2024 and administrative update in support of calendar year 2024 Medicare Advantage and PDP Final Rule.
- September 2024: Joint Medical Policy and Health Care Services UM Committee review (eff 10/1/24)
- September 10, 2024: No changes

Background, Product and Disclaimer Information

Point32Health prior authorization criteria to be applied to Medicare Advantage plan members is based on guidance from Medicare laws, National Coverage Determinations (NCDs) or Local Coverage Determinations (LCDs). When no guidance is provided, Point32Health uses clinical practice guidance published by relevant medical societies, relevant medical literature, Food and Drug Administration (FDA)-approved package labeling, and drug compendia to develop prior authorization criteria to apply to Medicare Advantage plan members. Medications that require prior authorization generally meet one or more of the following criteria: Drug product has the potential to be used for cosmetic purposes; drug product is not considered as first-line treatment by medically accepted practice guidelines, evidence to support the safety and efficacy of a drug product is poor, or drug product has the potential to be used for indications outside of the indications approved by the FDA. Prior authorization and use of the coverage criteria within this Medical Necessity Guideline will ensure drug therapy is medically necessary, clinically appropriate, and aligns with evidence-based guidelines. We revise and update Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests revisions.

Treating providers are solely responsible for the medical advice and treatment of Members. The use of this guidelines not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to eligibility and benefits on the date of service, coordination of benefits, referral/authorization, utilization management guidelines when applicable, and adherence to plan policies, plan procedures, and claims editing logic.
